PROFESSIONAL SUMMARY

Computer Science & Engineering student and technical leader with hands-on experience in full-stack development, distributed systems, cloud architecture, and startup technology implementation. Proven record of managing high-growth student networks and building resilient software systems. Proficient in Python, JavaScript, and C/C++, with practical expertise deploying production-ready REST APIs, real-time WebSocket pipelines, and cloud-native infrastructure on AWS.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C, C++, Java

Frameworks & Backends: FastAPI, Node.js, Express.js, REST APIs, Microservices, WebSocket

Web & Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Cloud & DevOps: AWS (EC2, S3, Lambda, CloudWatch, VPC), Docker, GitHub Actions, CI/CD, Netlify

Databases: MongoDB, MySQL, Supabase, PostgreSQL, NoSQL, Firebase

AI & ML: Random Forest, scikit-learn, LLM Integration, OpenAI API, Gemini API, Claude API

Developer Tools: Git, PyTest, Jest, Linux, System Architecture

PROFESSIONAL & LEADERSHIP EXPERIENCE

Vibellious

Noida, India

Founder & Chief Technology Officer (Self-Employed)

Jan 2026 – Present

- Launched an innovative QSR street-food startup, defining the technology vision and building modular systems that enabled physical expansion from a single prototype to 3 operational micro-kiosks in 6 months.
- Architected and built full-stack digital ordering systems and automated marketing tools, reducing customer checkout friction by 24% and improving operational workflows.
- Designed a centralized business analytics dashboard using PostgreSQL databases to aggregate inventory, sales data, and operational metrics, driving data-informed inventory management across micro-kiosks.

AWS Student Builder Campus Program

MUIT Noida, India

Campus Leader (SBCL)

May 2026 – Present

- Created and taught an AWS curriculum for 300+ students, covering EC2, S3, Lambda, VPC, and serverless patterns, boosting hands-on cloud proficiency.
- Led a technical group of 50+ student engineers, organizing hands-on labs focused on high-availability cloud architecture and distributed data engineering fundamentals.
- Mentored 10+ campus project teams through cloud deployment pipelines, optimizing system reliability and accelerating live integration timelines.

Google Student Ambassador Program

MUIT Noida, India

Student Ambassador – AI & Software Engineering

Apr 2026 – Present

- Spearheaded the integration of Gemini API workflows across 10+ student software projects, scaling AI utilization within a 200+ student technical network.
- Conducted two technical masterclasses—‘AI Architect Workshop’ and ‘Gemini Game Night’—training 100+ attendees on Python and end-to-end ML pipelines.

Feeding India - Zomato Early-Stage Initiative

India

Software Engineering Intern (Pre-University Portfolio)

Jun 2023 – Jul 2023

- Engineered and shipped an Android nutrition-quiz mobile application in Java, implementing efficient state management, quiz logic matrices, and user flow architectures.
- Collaborated within agile sprint cycles, using data analytics tools to evaluate user behavior patterns and iterate UI updates over multi-week deployment phases.

IHFC IIT Delhi - Delhi Robotics League

Delhi, India

Core Team Member & Embedded Systems Engineer (Pre-University Portfolio)

Jan 2024 – Nov 2024

- Engineered embedded firmware logic, low-level motor controls, and precise sensor calibration routines for a competitive robotics platform, securing a grand final placement.

TECHNICAL PROJECTS

THRONE – Real-Time Distributed IoT Health Monitoring System

Jan 2025 – Present

Core Developer & Team Lead (MUIT Noida, India)

- Architected a distributed IoT data pipeline processing 3+ parallel sensor streams via ESP32 nodes, standardizing data flow into a FastAPI backend and MongoDB database.

- Trained and deployed a scikit-learn Random Forest model on 1,000+ health records directly into production backend routes for live inference.
- Engineered an automated alert infrastructure using Twilio SMS APIs and real-time WebSocket push notifications optimized for embedded hardware resource boundaries.

Suraksha Setu – Distributed Disaster Management Platform

Aug 2025 – Oct 2025

Full-Stack & Systems Developer (India)

- Designed a resilient, zero-internet disaster coordination platform combining an AR-simulation frontend with a localized, decentralized hardware mesh network layer handling up to 50 peer-to-peer nodes.
- Implemented fault-tolerant message routing protocols across multiple distributed nodes to handle offline emergency synchronization and data persistence.

DevOrbit – Developer Ecosystem & Tooling Platform

Jan 2025 – Mar 2025

Full-Stack Developer (India)

- Built an automated developer hub integrating framework managers and custom CI/CD style microservices deployment pipelines, reducing configuration overhead by 40% for 30+ engineers.

EDUCATION

Maharishi University of Information Technology (MUIT)

Noida, India

B.Tech in Computer Science & Engineering

Sep 2025 – Present

- **Cumulative CGPA:** 8.0 / 10.0
- **Core Coursework:** Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Distributed Infrastructure

VOLUNTEER EXPERIENCE

Tech & Entrepreneurship Society, MUIT Noida

Noida, India

Society Leader, Organizer & Lead Speaker

Oct 2025 – Present

- Lead, host, and manage end-to-end operations for multiple high-impact tech and startup events on campus; coordinate technical workshops, manage speaker schedules, and deliver presentations to foster student-led innovation.
